

# Welland Academy's Career map

**Our vision**

At Welland Academy we want to raise children's aspirations and knowledge related to careers. We want to motivate the children to think about their future and we want to explore skills that will be required for different jobs. We want the children to feel positive about their future by the time they leave us in Year 6. We have a whole-school approach to ensure our careers programme is embedded and built upon year after year and is not just a one off event.

EYFS

**How**

An extensive UK and international research base provides evidence that careers in the curriculum can have some positive impacts on outcomes for young people. We have looked carefully at the needs of our children and used this to reflect our curriculum. All children participate regardless of their ability.

We deliver an interactive, lively and hands on curriculum in which children have the chance to meet and question professionals, attend career fayres, have trips to businesses such as Amazon and trips to Kidzania to name but a few things. We try to make real life links as much as possible.

We teach careers as a subject and, with the use of Skills Builder, within other subjects. Skills Builder is helping the children to identify the eight specific employability skills that they will require for future jobs – some have yet to be created!
